### Data Structures Used

1. QVector - used in pathASU.cpp, pathSaddleback.cpp, and pathCustom.cpp to store names of colleges and labels for outputting colleges to the UI.
2. QStringList - used in souvenirShop.h and souvenirShop.cpp for storing souvenirs and their prices and outputting them to the UI.
3. QVBoxLayout - used in pathASU.cpp, pathSaddleback.cpp, and pathCustom.cpp to manage widgets and containers for output
